us præter *Lysippum* sta-

Augustus Caesar Admonebat prætores ne pa-
terentur in Commissionibus nomen suum
absolefieri. Iniquum enim est virorum Il-

aut nomen eorum in circulis & vbiq̃ue pro-

Non ego picturam tuam externam ex æ-

A 3. lineare

lineare in animum induxi meum. Multæ enim me moverunt. causæ primum quia in hoc genere studij maior ætatis nostræ pars in Galliæ vestræ academijs enutrita fuit.

Ταυτ' ἔχω οὖν ἐμάθον καὶ ἐφροντίσα καὶ μετὰ τούτων
ἐσθλ' ἐπαθόν: τὰ δὲ λοιπὰ καὶ ἡδεια πάντα λέλειπτα.

Secundò amore quodam patriæ ita detinebar vt amoris mei ferventes flammæ abscondere non potui.

Nescio qua natale Solū dulcedine cunctos
Ducit, & immemores non sinit esse suæ.

Antiquitūs navigatu difficile credebatur mare ficulum tum ob ventorum flatus tum ob Scyllam monstrum illud marinum, (si poetis sit credendum) vel vt re vera est saxū navigatu terribile vnde in proverbium exijt.

Μαλέαν δὲ καμψας ἐπιλάβῃ οἴκαδ' ἔσται

flectens Maleam oblivisci debet & domus et patriæ. Non est minus periculosus oceanus quam ficulum fretum.

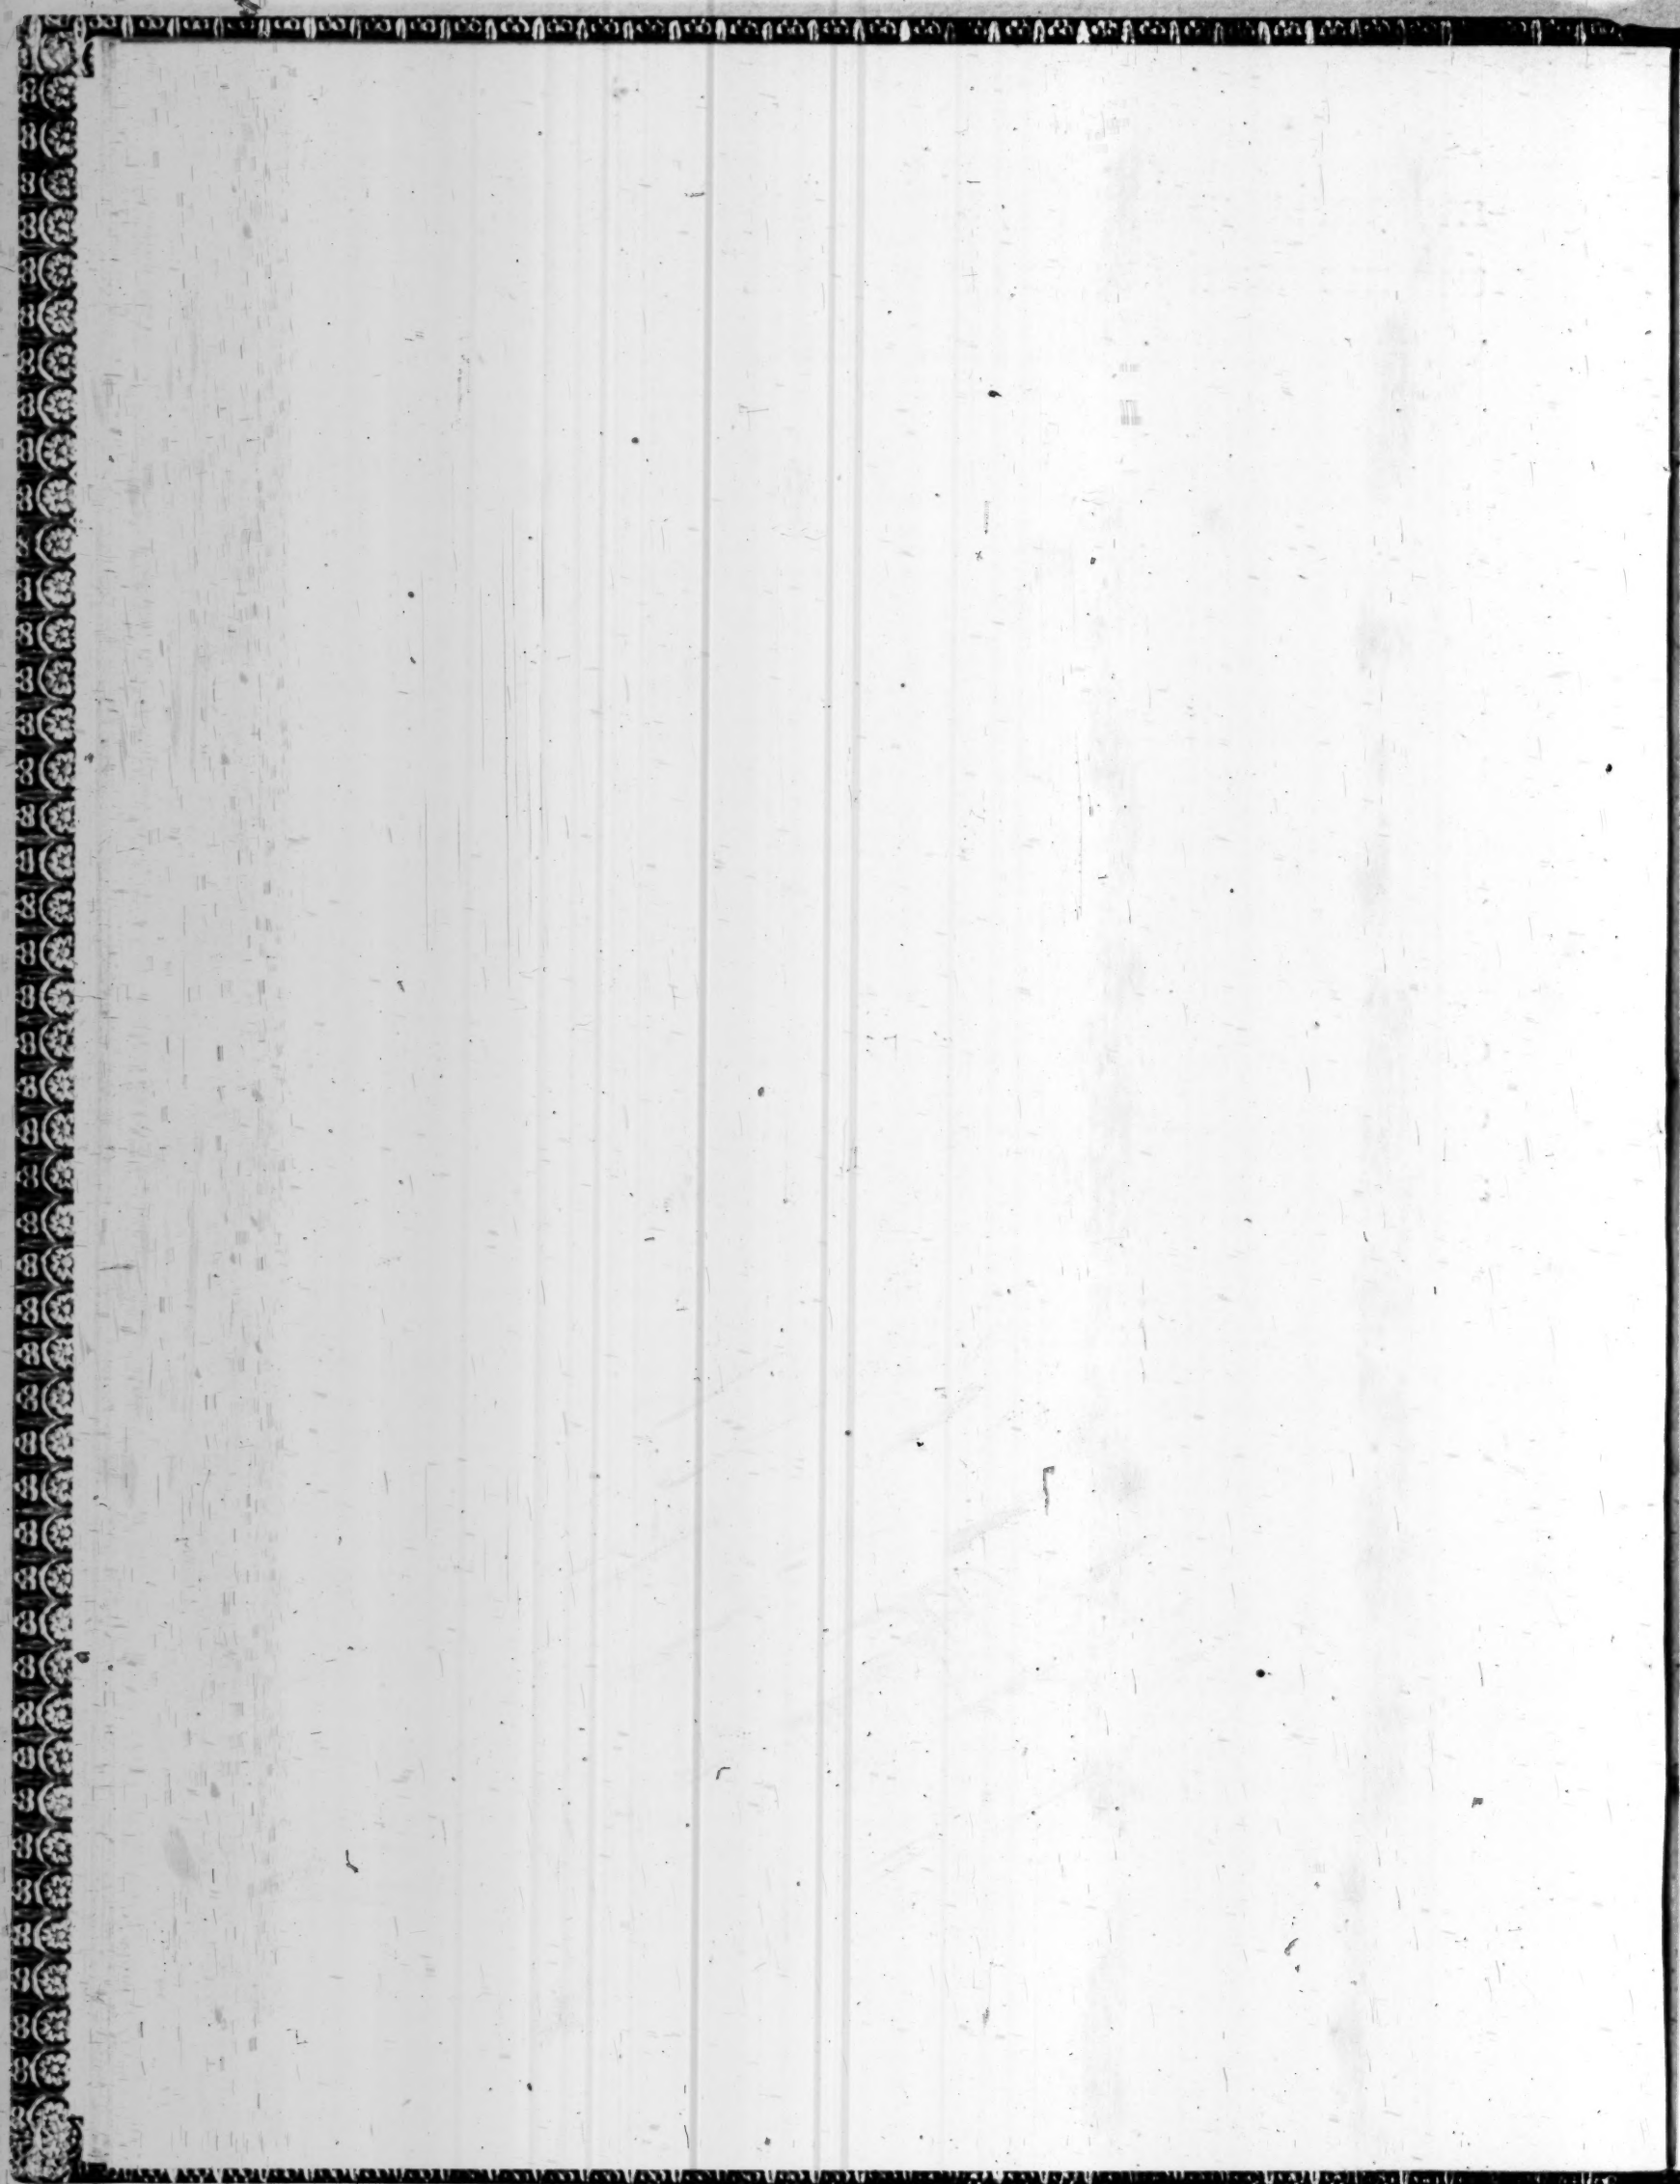

Imo nescio an sæpius mare nostrum contorqueat. Hoc tamen sanctè iuro me patriæ nunquam oblitum & nomen tuum in
memoria

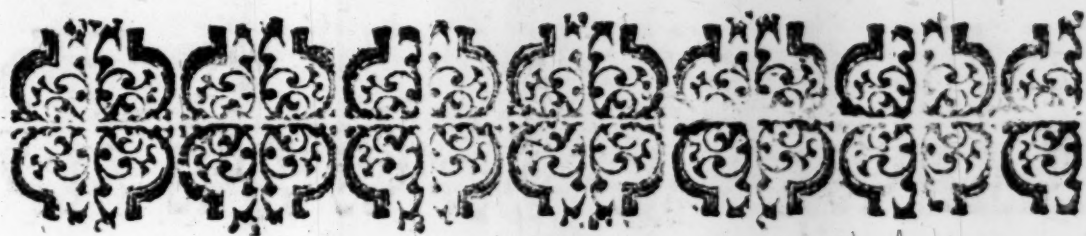

memoria retinuisse, tibi enim & splendori tuo me voui atque consecravi. Quis enim virtutes tuas dignitates & titulos, non admiratur, colat, amat?

Denique me mouit vt celsitudinij vestræ regis nostrj personam repræsentantj congratuler. Internus affectus | externos plausus requirit porro in hac patria in more constitutum est vt prima die Ianuarij strenulas quasdam suis offerant. Scribo tibi primum in carmine heroico heroicum carmen heroicum decet virum. Deinde exorationes quasdam congratulatorias repræfeto vt Deus op: max: te diu incolumem et lætū conseruet. accipe eadem voluntate qua dantur. vale.

Amplitudinis tuæ obseruantissimus

Gulielmus Gohaus.

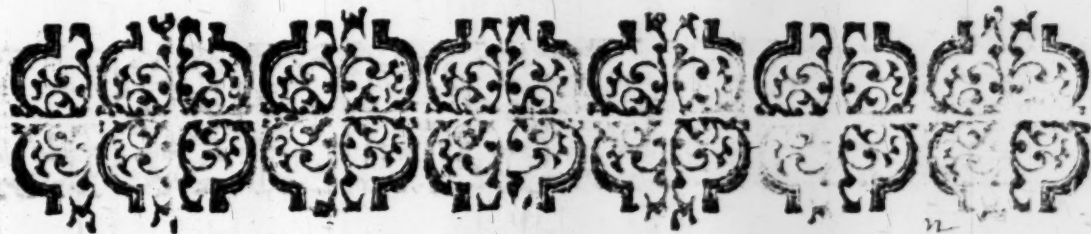

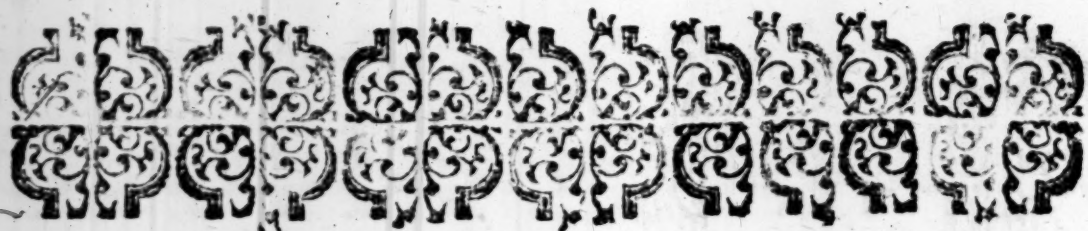

SIpateris Legate potens spatiosa tuorum
AEquora, inexplerta laudum tentare carina,
Musa superbit ovans gaudetque insana subire
Tantarum rerum moles. Heu nescia nostro
Qui sit in ore sonus, qualique innitimur arte,
Nec mage diffusum circumspicit undique pontū,
Quo me cunque fero. Sed tu laus maxima nostri
Temporis, & proles non inficienda Tonanti
Respice res nostras propius, flatuque sereno
Currere pacatum sine carbasa nostra per altum.

B

En

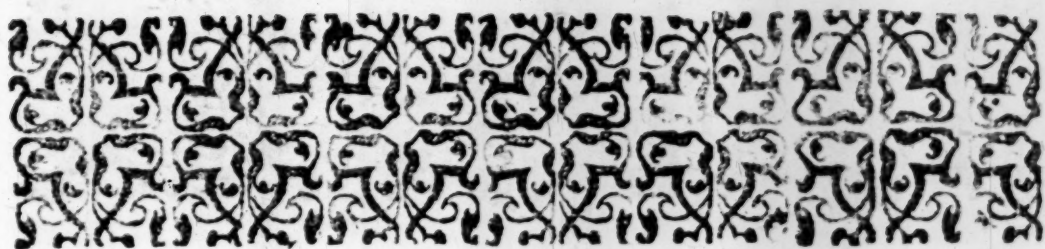

*En video iam iam claros surgentis Eoo,
Luciferi radios paulatim albescere, & Euros
Ad nutum pautare tuum, pulsáque repente
Tempestate diem clarescere, & aurea celso
Astra micare polo atque fauentia sydera nasci
Ergo canat fidibus te nostra Thalia remissis,
Quem modo dignatur Gallorum regna gubernans
Magna monarcha, tuæ virtutis pondere nitens
(Non metuit virtus magnos invicta labores)
Inuicti Anglorum regis demittere ad oras.*

Cui

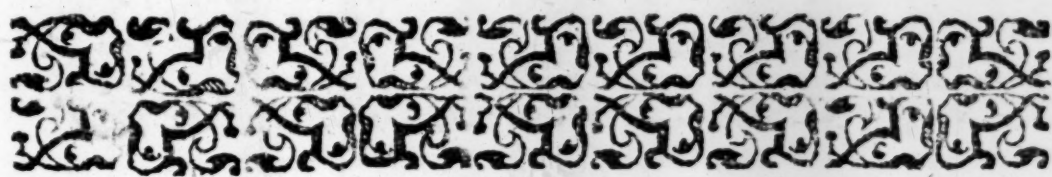

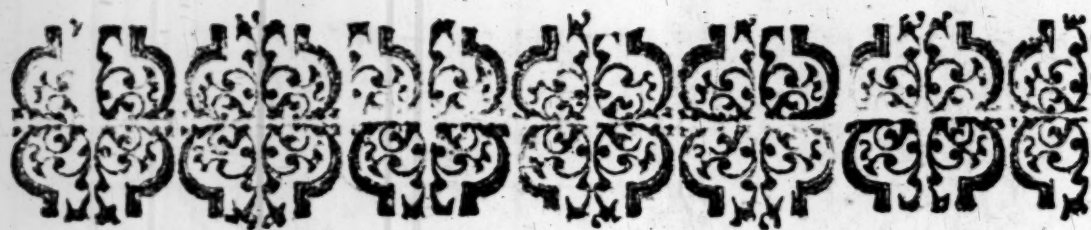

11982a

*Cui modo diuitiae, cui sit modo gloria Martis,
Gloria perpetuis semper decoranda trophaeis.
Nam tua vita modos sic est miranda per omnes
Nullus & ignoret, nam lux altissima famæ
Occultum nihil esse sinit, te transque remotas
Æquoris ambages, Atlanteosque recessus
Euehit & toti tua facta renuntiat orbi:
Nomen & acta simul resonat Gangetica tellus
Et Tartesiaci flauentia littora ponti,
Nam tua si tantum spectetur prima iuuentus.*

B 2

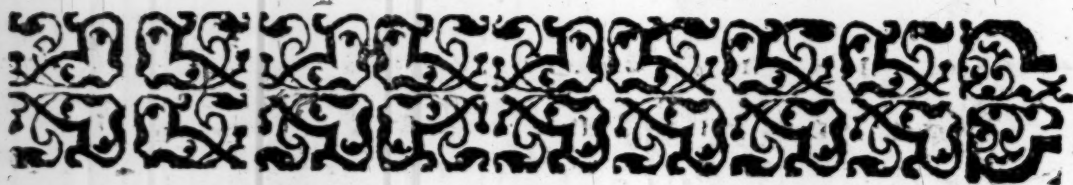

Ob=

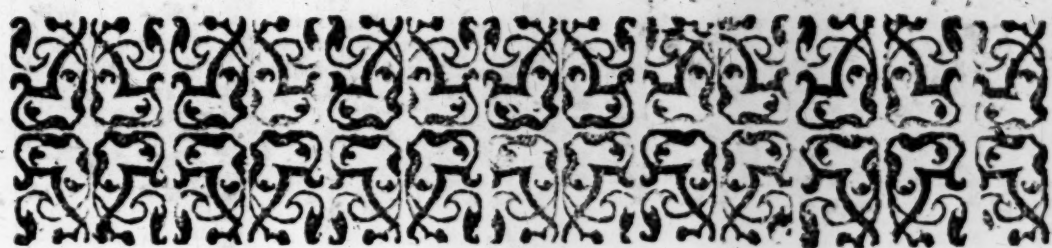

Obscurare sat est, & nostra & secula prisca
Pollebas etenim studio, multoque vigebas
Eloquio, vitijs non indulgere solebas,
Nec lasciua tibi mores laxauerat aetas.
Sed sortitus eras animum curamque senilem,
Siue cruenta feri meditaris praelia Martis,
Siue salutiferae respectas munera pacis.
Hoc pauci tenuere viri, primordia vestra
Sunt alijs fines. Titubans quid caetera tangam?
Caetera quid tangam numeris tangenda sonoris?

Laus

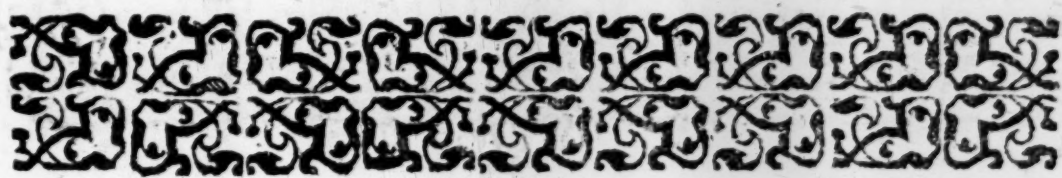

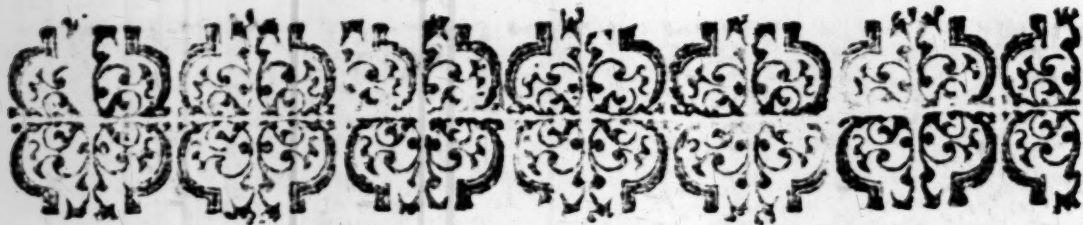

*Laus tua magna viget, tua vis, tua deniq; virtus,
Omni parte nitet. Diuersa volumina magna,
Laude vebunt Decios fortes, pulchrósq; camillos
Et qui Marte graui Pænum domuere ferocem
Scipiades: perhibet sed pagina nulla fuisse,
Nec posset talem qui sic claresceret æui
Prima parte sui: nec visa est vlla senecta,
Quæ te primævis virtutibus æquet in annis
Conticeant igitur, longè hic fæcundior extat
Materies, possunt plures hic carpere flores.*

B 3

Vel

*Vel si facta quibus presenti etate reluces
Prospicienda forent, nil non mirabile dictu est
Hoc tua sola probat pietas in Gallica sceptras
Testaturque fides. Te tota mente remissum
Aut penitus vacuum curis quis cernere possit?
Nec te vestra mouent sed publica comoda. cur non?
Præponenda tuis semper communia mandas.
Pro patria et sceptris nullum tentare recusas
Discrimen, Lybie credo squalentis arenas
Auderis superare graues, seu remige pontum*

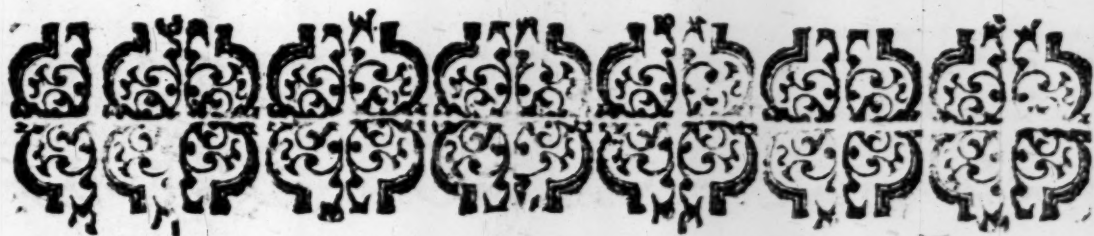

Sollicitare

*Sollicitare iuuat, subito quascunque per oras
Ibitur, et nulla sub tempestate timendo
Solstitio Meroe. bruma tentabitur Ister
Hinc populi plausu misti reuerendus amore
Cingeris et procerum studiis cōmunibus vnus.
Felix illa domus, multoque beatior ille
Qui sibi per proprias tot vectigalia curas
Quæsiuit nullique leui cum fraude nocebat
Adde quod obscuris gazam non addis in antris
Nec tenebris concludis opes, sed largior imbre*

Assuescis

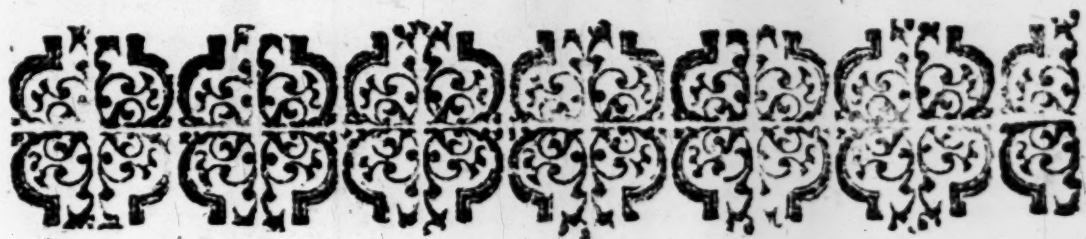

*Assuecis multas hominum ditare cateruas
Præterea te (nota loquor) prudentia magna
Ornat et vtilibus rectum præmittere suadet
Et dilapsa polo vestit sapientia, nequid
In consultus agas, solidam constancia mentem
Instruit, infirmum ne quid vel futile quidquam
Amplectare. Piam qua tu diis proximus, atque
Semideos inter reputaris viuida virtus
Sæuitia pulsa reddit clementia mentem.
Plura quid enarrem? felix Brittannia felix*

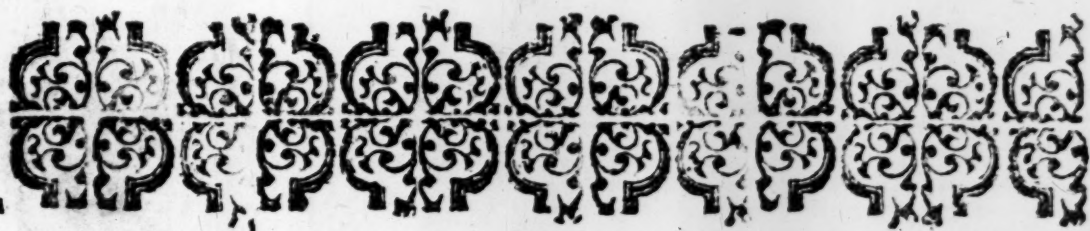

Quæ

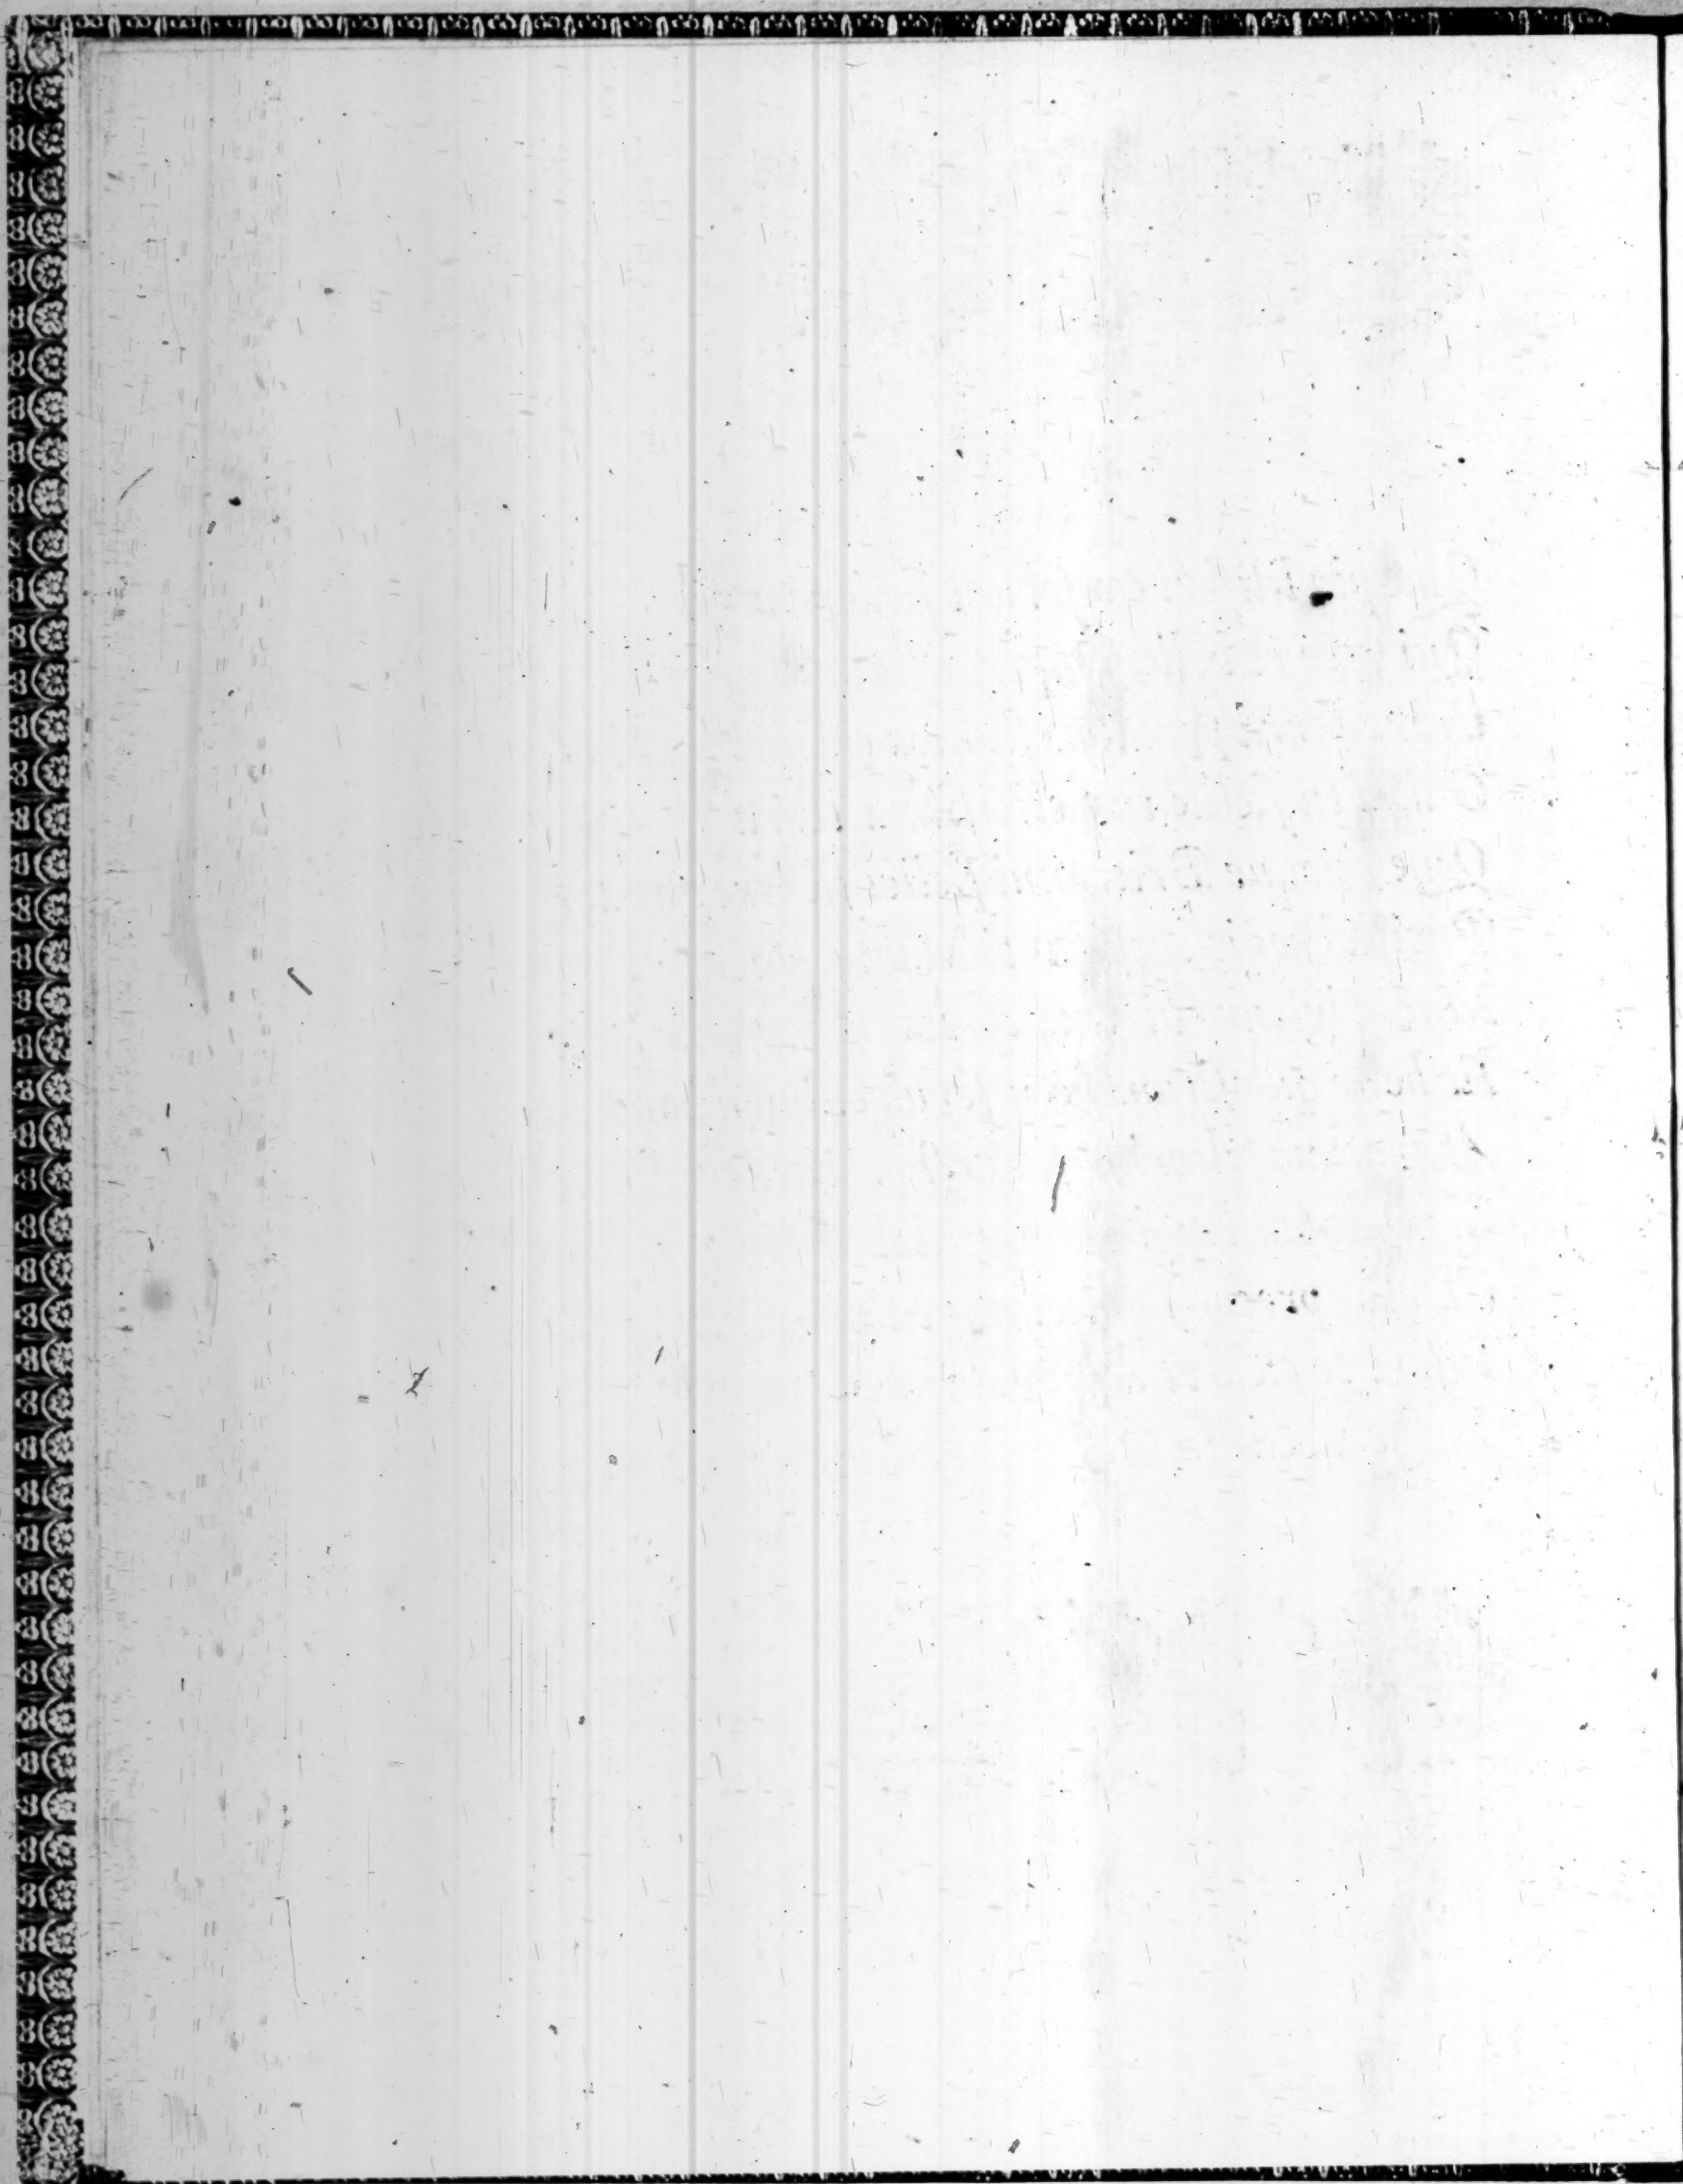

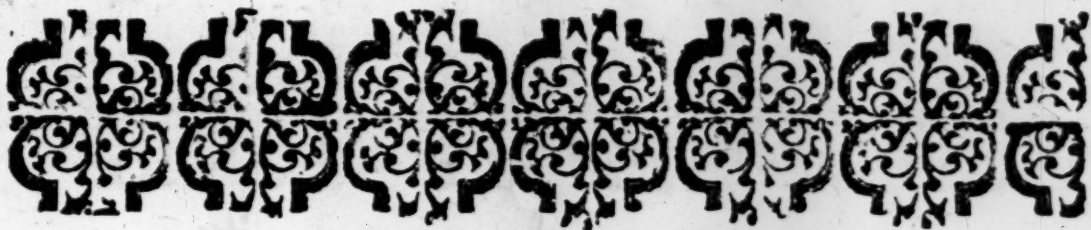

*Quæ pia liliferi conseruat fœdera regis
Qui pace et bello semper discrimine floret
Cuius terra parit præstantes optima fructus
Gallia tu fœlix tu fœlicissima terra
Quæ quoque Brittanni fœlici fœdere gaudes
Pacifici regis crepitanti Marte potentis.
Maeste igitur virtute comes nunc utere sorte
Et bene quæsitum bene serua culmen honorum
Atq; etiam vltèrius spes est protendere famam
Si modo prælongi cursum dabit Atropos æui
(Detq; precor) quæcunque tamẽ fortuna paratur
Insere te cælo et diuum de more vocari
Incipe, et insanas hominum contemnere curas*

C

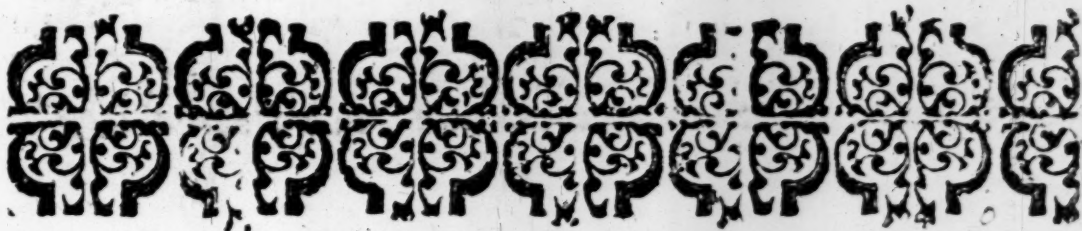

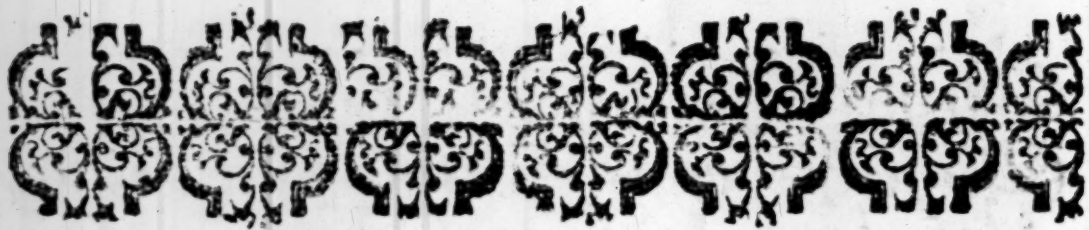

XENIOLVM

Carmine Elegiaco.

HÆtenus armatas hyemes Schyticasq; procel.
Expulit Arctoo mitior aura polo: (las
Æolus Æoliis clausit sub rupibus austros,
placatoque dedit vela secunda freto.
Hac tua vota tenus superi impleuere penates
Cælica cælestes vrna pluebat aquas
Nec tua latrantes trepidauit prora charibdes
Prora Caledonio non ruitura vado
Non Aquiloniaco tua carbasa mota tumultu
Torserat in geticæ Scirtidos vnda caput

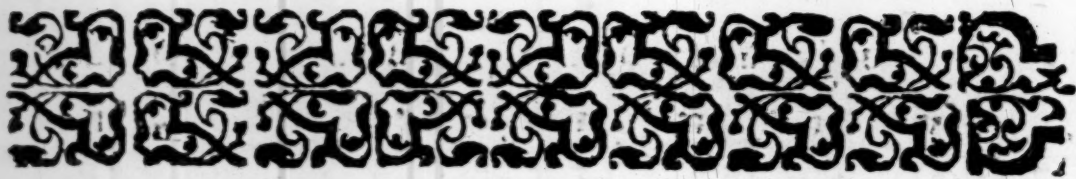

C 2

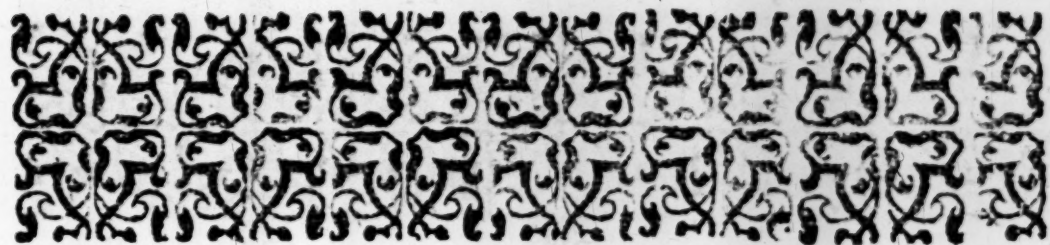

*Fausta tibi fortuna fauet tibi debita factis
Dona dat optatis sors agitata rotis.
Tutum fata tenent: quid enim? quæ munera tãto
Præmia tam digno quæ duce digna forent?
Qui licet egregio nomen de stemmate ducis
Hoc animi superas nobilitate genus
Et patrios apices propriis virtutibus augens
Qui te nobilitant nobilitabis auos
Hæccine sola tenes? imo his meliora sequutus
Bellerophronteo tu bibis ore lacu*

Internis

Internis externa foues : quique omnia lustras.

Martia palladia dirigis arma toga

Quæ tantis æquanda canam quæq; omnibus vna?

Cum superant Musam singula Dona meam.

Inflatis igitur clangat taratantara buccis

Triton, præsentis splendida facta canat

Nam dedit indomitus decus immortale gradivus

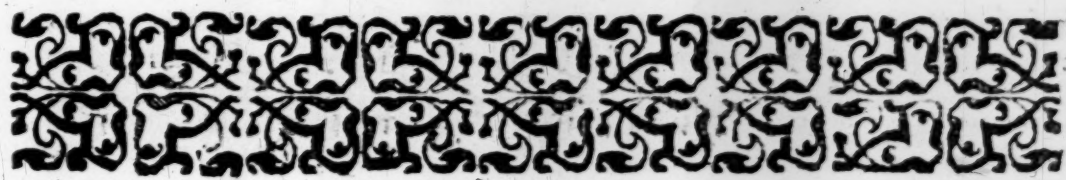

Et dederat clipeum flaua Minerva tibi

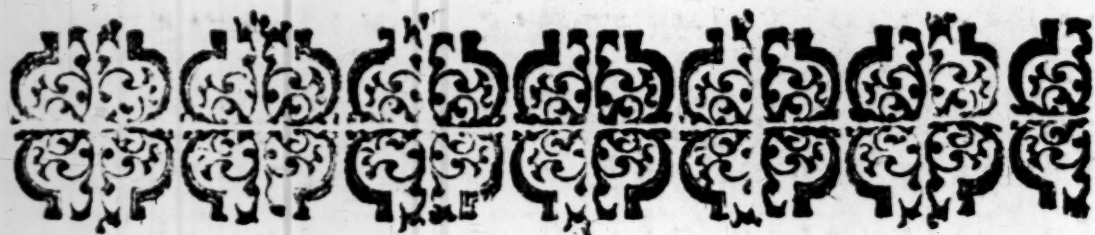

Phæbus, odoriferis et daphne cincta corollis

Imponunt capiti laureaserta tuo

Quid

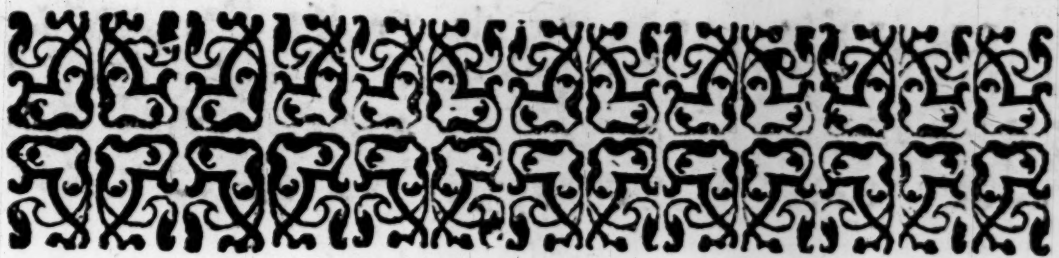

Quid ni: si præclarus bonos, si copia rerum
Fælicem si quem gloria magna facit,
Si quem nobilitant maiusculis splendida facta
Si doctrina viros magna beare solet
Si melos et teneræ præstans facundia linguæ
Magnaque si grauitas quem decorare solet
Solutus eris felix, sola est tua fama, tenebit
Te solum gremio calliopæa suo
Marte potens satrapa, fama super ætera note
Quære nouum vatem. Laudibus impar ego.

Sint

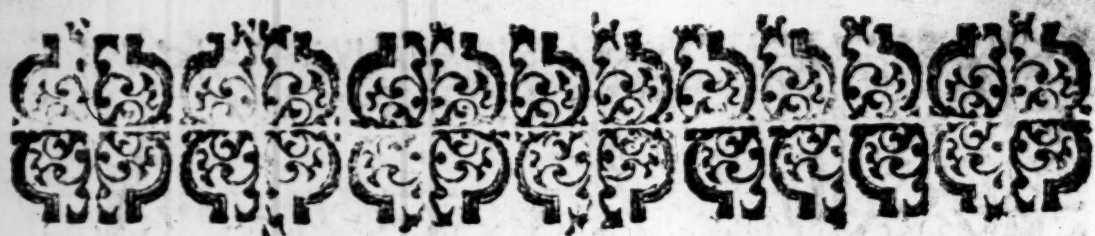

*Sint ventura tibi mage consona tempora votis,
Tuta serenato stet tua cymba mari.
Te tua fausta vehat melioribus orbita plaustris
Det faustè geminas Ianus uterque fores.
Gratior aura volet faustum rota torqueat annū,
Et tua felici sors agitetur equo.
Si sit & indoctis sors exoranda camænis,
Aut flectant modicæ numina celsa preces.
Aut tua sit nostris æquanda potentia votis
Sentirent animum tunc tua vota meum.*

Te

*Te duce sum saluus nostræ tu maxima nauis
Suppara non vllis dilaceranda nothis
Sed cum sola meam denudant carmina mentem,
Fronte serenata fac mea verba legas.
Dat quod habet mea Musa, Deus maiora petitis,
Det tibi qui crebris motibus astra regit.*

FINIS.
